Subject: RE: question from agricultural producers

ROUGHLY: from the northern edge of the city limits north to James Ranch – approximately 8-10 miles; from the southern edge of the city limits to the state line with New Mexico – approximately 15 miles or so.

Darrin,

Can you tell me what segments of the Animas River agricultural users draw from? Is it all along the river or do they all draw from within a specific reach of the river?

Thank you.
